

▼ New investment at PRECIMETAL PRECISION CASTINGS

PRECIMETAL has achieved a reorganization and modernization of its Wax Injection Shop including the arrival of 2 new semi-automatic 23 T injection machines. PRECIMETAL has produced 750.000 finished parts in 2016 (steel, stainless steel and other alloys). With this new configuration PRECIMETAL has today the capacity to double its production.

▼ New Shareholders for PRECIMETAL PRECISION CASTINGS

Since 02 February 2017, all shares in PRECIMETAL have been acquired by a new group of shareholders comprising seven of the company's directors, supported by investment funds led by CICLAD.
